PROJECTS

SmartMCA — Merchant Cash Advance

A Fintech Based Software Management System for Risk Analysis, Deal Flow, Tracking, Reporting and Customer Relationship Management for Cash Advance.

The SmartMCA platform analyses the merchant's deals in real-time to notify on deals possibly going south or even deals targeted as leads for refinance.

SmartMCA has a built-in collection scheduler for setting up recurring debits including a calendar to track those debits in real-time. Add rules and special cases like double debiting for holidays or other days missed.

Technology Used: Spring Boot, ReactJs, Keycloak, PostgreSQL, AWS

Visual Intelligence Control Center (a.k.a VICC)

Visual Intelligence Control Center platform has an incident management application specifically geared for Law Enforcement. The mobile application allows law enforcement to receive information from the public.

The mobile applications provide a wealth of notification, verification, dispatch, and response tools that improve security, enhance communications and provide a unique level of situational awareness.

The solution platform includes a mobile application which enables users to submit incidents to a hosted server, so that they can be viewed and tracked at an operations centre.

The Mobile Application allows user to take live video and broadcast to the control centre.

Technology Used: Java Vertx, React Native, PostgreSQL, AWS, Netzke, Keycloak

Tipxy -- E-commerce Application

An Analytical Business application for a Shopify Store Based E-commerce Application. The Online Merchant offering a large selection of craft & boutique wine and spirits.

Technology Used: Spring Boot, OpenXava, PostgreSQL, AWS, Shopify, Stripe

FasterNotes -- Home Health Software

FasterNotes Software is an online software for home health management and billing applications.

Processes like posting notes, filing, making staffing calls, tracking frequencies and following up on late visits are fully automated.

Technology Used: Netzke, PostgreSQL, Jasper Report
